NET-REBELS DARK WEB

TOR BROWSER

Tor Browser è un browser web gratuito e open source basato su Mozilla Firefox, progettato per garantire la privacy e l'anonimato degli utenti su Internet. Utilizza l'onion routing che è una tecnica di anonimizzazione delle comunicazioni in una rete di telecomunicazioni. In una rete onion, i messaggi sono incapsulati in "strati" di crittografia che vengono paragonati agli strati di una cipolla, dato l'incapsulamento. Il mittente rimane anonimo perché ciascun intermediario conosce solo la posizione del nodo immediatamente precedente e di quello immediatamente successivo.

CARATTERISTICHE

- ANONIMATO E PRIVACY
- NAVIGAZIONE ONION
- PROTEZIONE DALLA SORVEGLIANZA DA PARTE DI GOVERNI E ALTRE ENTITÀ
- BLOCCO DEI TRACKER E DELLE PUBBLICITÀ (RIDUCE LA RACCOLTA DI INFORMAZIONI PERSONALI DEGLI UTENTI)

SITI ONION

I siti onion sono siti web che esistono sulla dark web, una parte di Internet che non è accessibile attraverso i normali motori di ricerca o browser web convenzionali.

Sono spesso associati ad attività illegali, ma non tutti i siti onion sono illegali.

Si possono trovare siti come:

- **SITI ONION CHE COMMERCIANO INFORMAZIONI PERSONALI**
- **SITI ONION CHE DISTRIBUISCONO MALWARE**
- **SITI ONION CHE CONTROLLANO BOTNET**

You will also get last statement date /amount and next statement due /amount get your head round it (in case your method takes a while you know exactly around it.

You will receive the following card format:
CC number | expiry | CVV | first name | last name | address | city | State | zip | phone number (where available) | current balance | available credit |

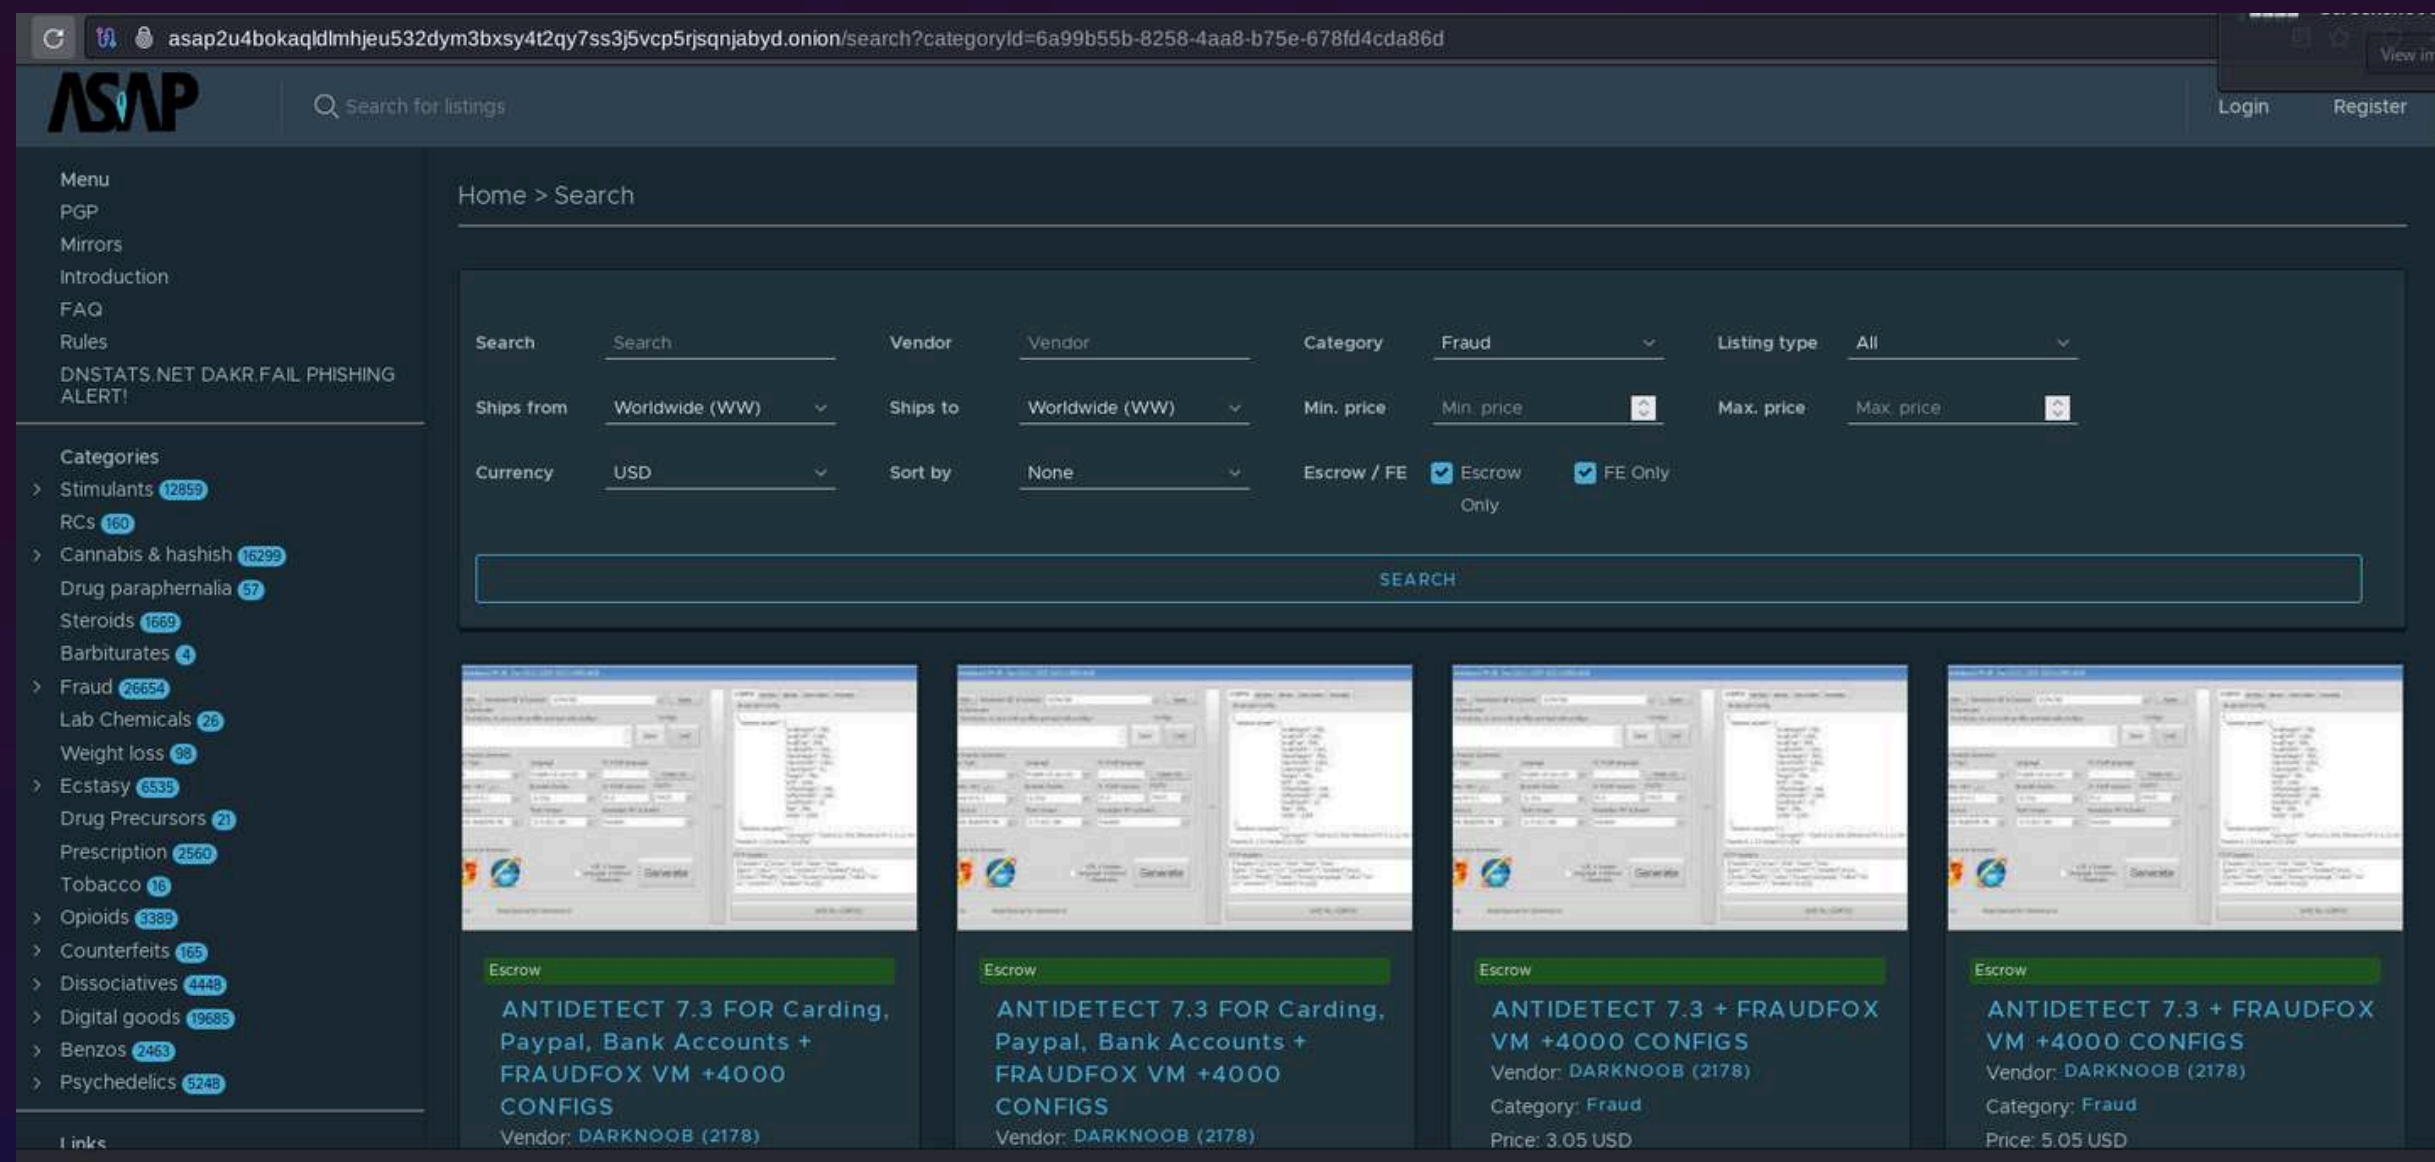

Cards designed for Paypal/stripe/square/venmo no more wasting time and m find a card that works, with me you will hit first time guaranteed!
Always bought cards not knowing how much to charge, and worried about ch much and killing the card? NOT with my cards, you will know EXACTLY how

Questi sono tutti siti di mercati illegali per la fabbricazione di documentazione.

i documenti in questione variano da passaporti a carte di identità, passando anche dalla contraffazione di carte di credito.

I mercati variano da quello europeo a quello americano.

I prezzi sono ovviamente alti e richiedono pagamenti difficilmente tracciabili o irrintracciabili come l'uso della blockchain e quindi di cryptovalute.

BEGINNER HACKING COURSE	INTERMEDIATE HACKING COURSE	EXPERT HACKING COURSE
Hacking courses for beginners teach the basics of ethical and black hacking, including the tools, techniques, and methodologies used by ethical and black hackers to identify and exploit vulnerabilities in computer systems and using it. The courses cover topics such as network scanning, vulnerability assessment, password cracking, and social engineering. The goal of these courses is to give students a solid foundation in ethical and black hacking, and provide them with the skills and knowledge necessary to identify and mitigate security risks in their own organizations or as a cracker. They provide hands-on experience through practical exercises and simulations.	Intermediate hacking courses provide more in-depth knowledge and skills in areas such as network and web application penetration, vulnerability assessment, and exploit development. These courses cover advanced techniques such as buffer overflow attacks, reverse engineering, and malware creating. Students learn to use tools such as Metasploit, Wireshark, and Nmap. The courses also emphasize ethical and black hacking a helping students to understand the importance of responsible hacking practices. By the end of the course, students should be able to identify vulnerabilities in systems, networks, and applications, and develop effective strategies for securing them or using the vulnerabilities to make benefit.	Hacking courses for experts are advanced level training programs designed to enhance the skills and knowledge of experienced hackers. These courses cover topics such as advanced penetration testing techniques, vulnerability analysis, exploit development, cryptography, network security, and digital forensics. The courses hands-on and include real-world scenarios and challenges. These programs are intended for individuals with a background in cybersecurity and proficiency in programming languages such as Python, C++, or Java. Upon completion of the course, experts will have the skills and knowledge required to identify and exploit vulnerabilities in complex systems and networks.
